

Manual, has concluded that it is merely a peculiar form of *L. groenlandicum*, so it is probable that *L. palustre* var. *dilatatum* does not occur in New England.—G. L. STEBBINS, JR., Harvard University.

LOMATOGONIUM ROTATUM (L.) FRIES IN MAINE.—While collecting on Schoodic Peninsula, Winter Harbor, Hancock County, Maine on August 4, 1928, the writer noticed growing abundantly about the brackish spray pools on the barren end of the point a gentian-like plant which was quite strange to him. On identification it proved to be *Lomatogonium rotatum* (L.) Fries, found in brackish marshes all through the Gulf of St. Lawrence region, but hitherto unknown south of the Magdalen Islands. The end of Schoodic Point, just to the east of Mt. Desert Island, has probably as great a concentration of sub-arctic types as any spot on the Maine Coast. *Sedum roseum* (L.) Scop., *Iris setosa* Pall. var. *canadensis* Foster, *Potentilla pectinata* Raf., *Euphrasia purpurea* Reeks var. *Randii* (Robinson) Fernald and Wiegand, and its forma *albiflora* Fernald and Wiegand are common, while the typical form of *Sagina nodosa* (L.) Fenzl. known from only two other stations in Maine, was also collected. Specimens of all these species are being deposited in the herbarium of the New England Botanical Club.—G. LEDYARD STEBBINS, JR., Harvard University.

JOSSELYN BOTANICAL SOCIETY OF MAINE.—The Thirty-fourth Annual Meeting of the Josselyn Botanical Society of Maine will be held July 9th to 12th, 1929, in the northern part of York County and the southwestern part of Oxford County, with headquarters at the "Hotel Malvern," Kezar Falls, Maine. The rates will be \$3.00 per day, American plan. Kezar Falls is on state highway No. 25. The railway station is Cornish. Members who notify Mr. E. L. Giles, proprietor of the Malvern, may be met at the station. There is also a stage from Cornish. Kezar Falls is on the Ossipee River. The region, both north and south, is much diversified, with hills and valleys, well supplied with lakes and small streams. That part of York County which may be easily reached by collecting parties has shown several plants of southern ranges, and it is hoped that others
